

# Programming in C guideline

## Week wise activities

Week	Contents and Activities	Session1 (Demonstration by Instructor)	Session2 (Assignment to Students and Evaluation)
(1) 22-28 Aug	<p>Programming (Editing, Compiling, Debugging) Data type, Operator, Expression, Console I/O (Printf, Scanf) Branching and Switching</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="http://ocw.mit.edu/courses/electrical-engineering-and-computer-science/6-087-practical-programming-in-c-january-iap-2010/lecture-notes/MIT6_087IAP10_lec01.pdf">http://ocw.mit.edu/courses/electrical-engineering-and-computer-science/6-087-practical-programming-in-c-january-iap-2010/lecture-notes/MIT6_087IAP10_lec01.pdf</a></li> <li>2. <a href="http://ocw.mit.edu/courses/electrical-engineering-and-computer-science/6-087-practical-programming-in-c-january-iap-2010/lecture-notes/MIT6_087IAP10_lec02.pdf">http://ocw.mit.edu/courses/electrical-engineering-and-computer-science/6-087-practical-programming-in-c-january-iap-2010/lecture-notes/MIT6_087IAP10_lec02.pdf</a></li> <li>3. <a href="https://www.youtube.com/watch?v=3QiItnIWmOM">https://www.youtube.com/watch?v=3QiItnIWmOM</a></li> <li>4. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr</a></li> <li>5. <a href="http://www.geeksforgeeks.org/c/">http://www.geeksforgeeks.org/c/</a></li> </ol> <p><i>IIIT Video Lecture</i></p> <ol style="list-style-type: none"> <li>1. <a href="#">Introduction</a></li> </ol> <p><i>Others</i></p>	<ol style="list-style-type: none"> <li>1. Swapping of two numbers</li> <li>2. roots of a quadratic equation</li> <li>3. print the ASCII value of a given alphabet</li> <li>4. biggest of 3 numbers using if...else</li> <li>5. change an integer to words</li> <li>6. arithmetic operations using switch...case</li> </ol>	<ol style="list-style-type: none"> <li>1. To convert temperature in centigrade to Fahrenheit</li> <li>2. To find the sum of individual digits of a three digit integer.</li> <li>3. Program to find the day of the given date</li> <li>4. To check whether a given year is leap year (or) not</li> <li>5. To measure the time taken for execution of five floating point multiplications.(hint s: use the library function gettimeofday)</li> </ol>

<p>(2) 29-4 Sep</p>	<p>Looping</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/watch?v=atfNaIY9WbQ">https://www.youtube.com/watch?v=atfNaIY9WbQ</a></li> <li>2. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr</a></li> <li>3. <a href="http://www.geeksforgeeks.org/c/">http://www.geeksforgeeks.org/c/</a></li> </ol> <p><i>IIIT Video Lecture</i> To be given <i>Others</i></p>	<ol style="list-style-type: none"> <li>1. To find the average of first n natural numbers</li> <li>2. To count the number of digits in an integer</li> <li>3. To check whether a given no. is prime (or) not</li> <li>4. Program to reverse an integer</li> <li>5. Program to calculate the value of <math>\exp(x)</math></li> <li>6. write C programs to print the following formats <b>see fig 1</b></li> </ol>	<ol style="list-style-type: none"> <li>1. Program to print the multiplication table</li> <li>2. Program to find the sum of Fibonacci series</li> <li>3. To print all the divisors of a given number</li> <li>4. Program to calculate the cosine series (<math>\cos(x)</math>)</li> <li>5. Program to calculate the sine series (<math>\sin(x)</math>)</li> <li>6. write C programs to print the following formats <b>see fig 2</b></li> </ol>
<p>(3) 5-11 Sep</p>	<p>Function</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr</a></li> <li>2. <a href="http://www.geeksforgeeks.org/c/">http://www.geeksforgeeks.org/c/</a></li> </ol> <p><i>IIIT Video Lecture</i> To be given <i>Others</i> Start exercise 30 Days of Code Challenges <a href="https://www.hackerrank.com/domains/tutorials/30-days-of-code">https://www.hackerrank.com/domains/tutorials/30-days-of-code</a></p>	<ol style="list-style-type: none"> <li>1. Program to find the factorial of a given number</li> <li>2. Program to find LCM and GCD of the given two numbers</li> <li>3. To convert a decimal number to a binary number</li> <li>4. Find the root of a equation using Bisection method</li> </ol>	<ol style="list-style-type: none"> <li>1. Find the root of a equation using Newton Raphson method</li> <li>2. Find the no. of terms in power series of <math>\exp(x)</math> required to get an accuracy 0.0001.</li> </ol>
<p>(4) 12-18 Sep</p>	<p>Reserve</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr</a></li> </ol> <p><i>IIIT Video Lecture</i> To be given <i>Others</i> Check Progress 30 Days of Code Challenges</p>		

<p>(5) 19-25 Sep</p>	<p>Array</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr</a></li> </ol> <p><i>IIIT Video Lecture</i></p> <p>To be given</p> <p><i>Others</i></p> <p><i>Check Progress</i></p> <p><i>30 Days of Code Challenges</i></p>	<ol style="list-style-type: none"> <li>1. Program to read and reverse an array</li> <li>2. Solution of simultaneous equation using gauss elimination method</li> <li>3. Program to generate Floyd's triangle</li> <li>4. To find sum of all the elements of the given matrix</li> <li>5. Program to add the given two matrices</li> <li>6. Program to multiply the given two matrices</li> <li>7. Program to find the length of the given string</li> <li>8. Program to reverse the given string</li> </ol>	<ol style="list-style-type: none"> <li>1. Program to generate Pascal's triangle</li> <li>2. Program to generate magic square</li> <li>3. Find sum of diagonal elements of the given matrix</li> <li>4. Find smallest &amp; biggest elements of the given matrix</li> <li>5. Program to concatenate the given two strings</li> <li>6. To check the given string is palindrome (or) not</li> <li>7. Write a C program to search a number from a set of integers stored in an array. If the number is present then print the position of the integer in array. Allow multiple entries of the same number.</li> </ol>
<p>(6) 26-2 Oct</p>	<p>Pointer</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNFlnVz2j3YRlqr</a></li> </ol> <p><i>IIIT Video Lecture</i></p> <p>To be given</p> <p><i>Others</i></p> <p><i>Check Progress</i></p> <p><i>30 Days of Code Challenges</i></p>	<ol style="list-style-type: none"> <li>1. Swap two numbers using swap function</li> <li>2. To find the length of the string using pointers</li> <li>3. To copy one string to another using pointers</li> <li>4. Concatenate the given two strings using pointers</li> <li>5. To compare the given two string using pointers</li> </ol>	<ol style="list-style-type: none"> <li>1. Write a C program to determine if the given string is a palindrome or not</li> <li>2. To insert a substring in to given main string from a given position.</li> <li>3. To delete n Characters from a given position in a given string.</li> </ol>
<p>(7) 3-9 Oct</p>	<p>Mid Semester Examination</p>		
<p>(8)</p>	<p>Dussehra Vacation</p>		

10-16 Oct			
(9) 17-23 Oct	<p>Structure and File</p> <p><i>Online Resources</i></p> <ol style="list-style-type: none"> <li>1. <a href="https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNF1Nvz2j3YRlqr">https://www.youtube.com/playlist?list=PLRdux5uhMFiepKgD56YNF1Nvz2j3YRlqr</a></li> </ol> <p><i>IIIT Video Lecture</i></p> <p>To be given</p> <p><i>Others</i></p>	<ol style="list-style-type: none"> <li>1. Program to maintain student details using structures</li> <li>2. Program to write and read data from a file</li> <li>3. Program to maintain student details using files</li> <li>4. Program to merge the contents of two files</li> </ol>	<ol style="list-style-type: none"> <li>1. Program to maintain employee details using structures</li> <li>2. Write a C program that uses functions to perform the following operations: Read a complex number, Print a complex number, Add two complex numbers, Multiply two complex numbers (Note: Represent complex number using a structure.)</li> <li>3. Read integers and store odd &amp; even no. in a file</li> <li>4. Program to maintain employee details using files</li> <li>5. Program to encrypt and decrypt a file</li> <li>6. Write a C program to read a sequence of positive integers (data stream) from a file. It prints the count (frequency) of different odd digits present in the data stream. The number of integers in the data stream is not known prior to the user.</li> <li>7. Write an C program to concatenate two files : that is, append the content of one file at the end of</li> </ol>

			another and write the result into a third file
(10) 24-30 Oct	Project Allocation (3 Members in a group) Refer to Project Ideas		
(11) 31-6 Nov	Project Progress		
(12) 7-13 Nov	Project Progress		
(13) 14-20 Nov	Project Submission & Evaluation		
(14) 21-27 Nov	Questions & Answers		
(15) 28-4 Dec	No Class		
(16) 5 Dec	End Semester Examination

## List of Books

### Text Books:

1. Programming in ANSI C (2009), E Balagurusamy, Tata McGraw Hill.
2. Programming with C (2009), B. S. Gottfried, J. K. Chhabra, Schaum's Outline Series, Tata McGraw Hill.

### Reference Books:

1. The C Programming Language (2nd Ed.), B. W. Kernighan, D. Ritchie, PHI.
2. Let Us C, Y. Kanetkar, BPB Publisher.

## Project Ideas

### 1) Static Code Checker for C

To help coders in general and fellow college students in particular, building a tool which can run static code checks on a given C code can help improve the quality of code to a great extent.

**Features:** Static code checker can check and warn the programmer about best practices, possible mistakes, loopholes without even executing the code. For example.

- Memory leaks
- Unused variables
- Undeclared variables
- Array's bound checks
- Dead code

**Implementation:** Static code checker could be written as a plugin to any existing IDE like Eclipse/Codeblocks (recommended) or it can be in the form of any website where you paste your code and run static code checks.

**References:** There are a lot of existing static code checkers available. For example the best static code checkers available for Javascript are JsLint and JsHint.

<http://www.jslint.com/>

<http://jshint.com/>
